

Lucas Wehr

Pullman, WA | 509-601-0556 | lucas.wehr@wsu.edu | <https://www.linkedin.com/in/lucas-wehr/> | github.com/lucaswehr

PROFILE

Software Engineering student at Washington State University with a 3.9 GPA. I have experience building and maintaining production full-stack applications using React, Python, REST APIs, and SQL. I've shipped features used by hundreds of users, worked closely with teams in Agile environments, and enjoy designing modular systems that scale. I'm seeking a Summer 2026 Software Engineering Internship where I can contribute to impactful products while continuing to grow as an engineer.

EDUCATION

Washington State University

Pullman, WA

Bachelor of Software Engineering

GPA: 3.9

PROJECTS

The Last Paladin (<https://lucaswehr.itch.io/the-last-paladin>)

Apr. 2025 – Sep. 2025

Washington State University

Pullman, WA

- Built a modular game architecture using SFML with 1000+ lines of C++, featuring 12+ animated sprites, tile-based terrain, and physics-driven movement.
- Reinforced C++ principles such as polymorphism, inheritance, and class design through direct implementation.
- Designed and programmed enemy AI behavior using decision logic, enabling dynamic interactions and responsive combat.
- Created the project independently over 5 months outside of coursework, and published on itch.io with 100+ downloads.

AI Resume Critique Web App

Sep. 2025

Washington State University

Pullman, WA

- Constructed a web application that analyzes resumes for readability, clarity, and grammar using the Cohere AI API.
- Developed the backend with Python & Flask, integrating API calls and dynamically rendering HTML/CSS feedback in a scrollable, user-friendly interface.
- Styled the UI with clean headings and interactive elements to enhance readability and user experience.
- Implemented live scoring and detailed AI suggestions, providing actionable feedback to improve resumes.
- Gained experience in API integration, web development, Jinja2 templating, and responsive frontend design.

Interactive Event Map (<https://wehr-ticketmaster-event-map-6ab21ae33b7f.herokuapp.com/>)

Oct. 2025 - Dec. 2025

Washington State University

Pullman, WA

- Built a React-based map interface that integrates with the Ticketmaster API to search and filter live events by city and number of events.
- Used MySQL to store and query cached event data locally, enabling faster lookups by 40% and offline access.
- Experience deploying cloud-hosted applications via Heroku's AWS-backed platform
- Enabled users to create and publish their own events on the map, adding multiple filtering options that surfaced smaller, niche local events and increased community event visibility by 45%.

WORK EXPERIENCE

Web Developer Intern

Jan. 2026 – May 2026

Small Development Team — Remote / Pullman, WA

- Maintain and extend a production React-based web application acquired by the university for \$5,000.
- Collaborate with a small engineering team using the Agile development cycle (sprints, stand-ups, code reviews).
- Implement features and bug fixes for an AI-powered scheduling chatbot that converts student conversations (classes, sleep, routines) into structured weekly schedules using prompt engineering.
- Work with React, JavaScript, and backend components to ensure stable, user-friendly functionality.
- Contribute to planning discussions and help prioritize tasks based on user needs and technical constraints.
- Tested by 120 freshman, with planned rollout to 400–500+ users in full production.

SKILLS

-Languages: C/C++, C#, Python, JavaScript

-Tools: VS Code, Linux, Git, SFML, Flask, Makefile, HTML, CSS, MySQL, React.js, Heroku, Unity, Tableau, PostgreSQL, SQLite, REST API, Pytorch, LangChain

-Concepts: API Integration, Data Structures/Algorithms, Game Design, Databases, Agile Development, Prompt Engineering, Cloud Deployment
